

THE ASTRONAUT AND THE STAR

Written By Charlotte
year 7.

There one lived a man, but this was no ordinary man, this man was an astronaut. He had stories to tell and photos show. The astronaut had a wife he loved very much, a beautiful daughter and a handsome son.

One day the astronaut's wife began to get sick. Very sick. After ridiculous amounts of tests the doctors came to an agreement that the astronaut's wife had developed cancer. They were told that she only had a few weeks to live and surely enough they were right. They spent those last 3 weeks of her life as a family spending as much time as possible together. After 3 weeks the astronaut's wife died on the 8th of September.

about 4 weeks after the death of his wife, astronaut's son developed pneumonia. They took him to the doctors only to find out that his poor son only had 1 week left to live. They spent that 1 week ~~sitting~~ making sure they do everything on his bucket list. After 1 week the astronaut's son died on the 20th of October.

Only having his daughter left, the astronaut fell into a state of depression a few days later his daughter was diagnosed with meningitis and the astronaut's daughter was

told she only had 3 days left to live and surely enough 3 days later the astronaut's daughter died on the 23rd of October.

The astronaut isolated himself from the ^{society} world. One night he sat outside on his porch and looked up at the stars and saw the most beautiful star ever and that's when he knew His family would be with him every second of the way.
